

**FOR IMMEDIATE RELEASE**

**SEISMIC EQUIPMENT SOLUTIONS  
ACQUIRES 24,000 CHANNELS OF HAWK 3C CABLE-LESS EQUIPMENT**

**Houston, Texas (September 12, 2013)** – Seismic Equipment Solutions ("SES") announced today that it has acquired 24,000 channels of INOVA Geophysical's Hawk 3C cable-less seismic recording equipment and has expanded the scope of their Preferred Global Rental Partnership with INOVA. This acquisition reinforces SES' position as the largest rental provider of cable-less seismic recording equipment in the world. The agreement with INOVA also provides SES with a mechanism to supply much larger channel requirements to their customers when required.

With the addition of the Hawk system to the lease pool, SES continues their philosophy of providing a wide array of the most technologically advanced seismic recording systems and world class technical support in the industry. This combination plays a vital role in helping customers overcome the ever increasing environmental challenges involved in seismic data acquisition.

Travis Barker, President of SES stated "We are excited to be adding the Hawk system to our lease pool in response to the growing demand from our customers for this leading edge cable-less technology.

Glenn Hauer, President and CEO of INOVA, noted "SES has provided exceptional technical support and rental services for numerous INOVA systems over the past 10 years which makes them ideally suited to support the Hawk system." Mr. Hauer also added "This acquisition of Hawk further strengthens our relationship with SES as INOVA's Preferred Global Rental Partner".

**About Seismic Equipment Solutions**

With headquarters in Houston, Texas, offices in Colombia, Canada and representatives in London, Moscow and Jakarta, SES provides exceptionally maintained lease equipment, world-class field support, training, equipment repairs and parts sales worldwide.
