

FOR IMMEDIATE RELEASE

Seismic Equipment Solutions debuts Datataxi

Houston, TX (September, 2007) – Seismic Equipment Solutions (SES) has introduced the DataTaxi which is a lightweight field deployable data transport device for the collection and transfer of data between I/O RSR field station units and data transcribers. Designed to facilitate the rapid transfer of data, the Datataxi has a built in water ingress

and operating temperature warning, Auto Power Off options, battery 'gas gauge' and operational indicators, factory upgradeable memory subsystem and no moving parts. The Datataxi is a fraction of the weight of the old DCU and 100% Solid State.

SES continues to consistently deliver innovations that add value to the seismic industry processes and extend the capabilities of data transport systems.

About Seismic Equipment Solutions

With headquarters in Houston, Texas, and representatives in Moscow, London, Calgary, Bogota, and Jakarta, SES is a global leader in seismic equipment rentals and support. SES provides exceptionally maintained lease equipment, field support, training, equipment repairs, and part sales.
