

FOR IMMEDIATE RELEASE

Seismic Equipment Solutions (SES) Continues to Expand its Marine and Transition Zone (TZ) Market Focus ***SES Marine Division Announces New Leases of Marine Seismic Equipment***

Houston, TX (November, 2010) – Seismic Equipment Solutions (SES) announced the successful completion of two equipment Leases from their new Marine Division. These leases are at the forefront of SES' sales and marketing penetration strategy as the company continues to expand its Marine and Transition Zone equipment and technical support solutions worldwide.

Stuart Porteous, Senior Vice President - Marine Sales and Marketing, SES, pronounced, "We are delighted to not only have penetrated the high resolution market with our first DigiBird lease, but to have provided a receiver solution in the TZ market to one of our historic land customers. We are especially pleased to be initiating a long-term lease in the deep-water 3D high capacity streamer arena, a market segment planned as part of our future marine solutions. Our immediate plans are to expand our presence in energy source solutions to round out the support to our rental customers in order to meet our goal of single source solutions."

In addition, TransGulf Tech, one of the leading marine seismic air gun and lead-in termination specialists in the industry, which was acquired by SES in 2009, has now been fully integrated into SES' Marine Division. SES has enhanced their position as the industry's preferred partner by expanding their technology portfolio and providing their customers the most comprehensive Marine and Transition Zone equipment solutions.

About Seismic Equipment Solutions

With headquarters in Houston, Texas, and representatives in Moscow, London, Calgary, Bogota, and Jakarta, SES is a global leader in seismic equipment rentals and support. SES provides exceptionally maintained lease equipment, field support, training, equipment repairs, and part sales.
